YUVANESH KS

Software Engineer • Cloud & Linux Infrastructure

✉ yuvaneshkarunakaran@gmail.com 🔗 Portfolio Website 💻 GitHub (@North-Abyss) 👥 LinkedIn (@yuvaneshks)

📍 Vellore, Tamil Nadu, India

PROFESSIONAL SUMMARY

Hands-on **Software Engineer** specializing in Linux systems, self-hosted virtualization infrastructure, automated CI/CD pipelines, and reactive cross-platform Flutter application architecture. Proven track record deploying production platforms, published Google Play Store applications, client server infrastructure (Bunny.net CDN, Docker), and open-source quantum machine learning research.

TECHNICAL COMPETENCIES

Core Languages:	**Java**, **Python**, **Dart**, Bash Scripting, C/C++, SQL, HTML5/CSS3
Systems & DevOps:	**Linux Administration** (Arch, Rocky, Debian/Ubuntu), **Docker**, **KVM/QEMU**, Git CI/CD, Bunny.net CDN, Nginx, Tailscale, Hetzner VPS
Application & Networking:	**Flutter**, Provider, WebRTC P2P, mDNS LAN Discovery, AES-GCM Payload Encryption, REST APIs, PocketBase
AI & Research:	PennyLane (Quantum ML / Qutrits), PyTorch, SHAP Explainability, TabNet, TensorFlow Lite Micro

ENGINEERING EXPERIENCE

Starvik Solution Pvt Ltd — **Flutter Internship Team Lead & Infrastructure Engineer** **Jun 2026 – Jul 2026**

- Architected and delivered **Abyss Chat**, a decentralized cross-platform P2P communications suite featuring WebRTC audio/video call orchestration, mDNS local discovery, and AES-GCM encryption.
- Engineered corporate server infrastructure, continuous deployment (Git CI/CD), edge storage routing with Bunny.net CDN, and environment secret shielding for Starvik's web ecosystem.
- Mentored engineering interns on clean reactive state management, asynchronous Dart concurrency, and production build pipelines.

Indian Data Club (IDC) — **Joint Secretary • AMCET Chapter** **Aug 2025 – Present**

- Co-directing technical initiatives and workshops for a pan-India student data science community, organizing code sprints, hackathons, and AI peer-learning sessions.

1M1B • AICTE • Salesforce — **Green & Tech Intern (Batch 5)** **Aug 2025 – Oct 2025**

- Selected among top applicants across India for sustainability-driven tech exploration, researching digital solutions for environmental impact tracking.

Virtualization & Enterprise Home Lab — **Systems Architecture Project** **2025 – 2026**

- Configured multi-OS virtualized test environment on Rocky Linux and Arch using KVM/QEMU, containerizing localized services with Docker and automating provisioning with Bash.

RELEASED PRODUCTS & FEATURED PROJECTS

Abyss Chat — Decentralized P2P Mesh Communications `Google Play Store 100% Production` **2026**

- Engineered a server-independent P2P messaging and video application utilizing Flutter, WebRTC peer data channels, PeerJS STUN servers, and mDNS LAN node discovery.
- Achieved 100% production rollout on the **Google Play Store** after clearing Google's strict review requirements.

Trackify — Cross-Platform Habit Tracking Product `Released on 4 Platforms` **2026**

- Engineered and shipped high-performance privacy-first tracking application deployed to Web, Android, Linux, and Windows desktop with Provider and SharedPreferences.
- Implemented custom high-gloss claymorphic UI system and automated cross-compilation release builds via GitHub Actions CI/CD.

Q-Ternary VQC: Logarithmic Qudit Compression `Open-Source Research` **2026**

- Formulated hybrid Quantum-Classical Variational Quantum Classifier (VQC) in PennyLane/PyTorch utilizing 3-level Qutrits, reducing feature footprint by 33% without information loss.
- Achieved 88.60% clinical accuracy with 72 trainable parameters, integrating SHAP biomarker attribution for explainable quantum utility on standard CPU hardware.

SMART-TRAP — IoT Autonomous Pest Surveillance `Hardware Hackathon` **2025 – 2026**

- Engineered battery-efficient edge IoT device using ESP32, LoRaWAN long-range telemetry, and TensorFlow Lite Micro for automated real-time agricultural pest monitoring.

EDUCATION

Annai Mira College of Eng. & Tech. **2023 – 2027**

B.Tech in Information Technology (Anna University)

CGPA: 8.26 • 2× Smart India Hackathon (SIH) Participant • Databricks AI Challenge • NASA Space Apps • GFG Vultr Hackathon

CERTIFICATIONS & HONORS

- **Oracle:** Cloud Infrastructure Generative AI Professional
- **Google:** Cybersecurity Professional Certificate
- **Cisco:** CyberOps Associate • Networking Essentials
- **AWS:** Cloud Quest: Cloud Practitioner
